Profile

Frontend Engineer with experience building scalable, responsive, and user-focused web applications using React, Next.js, TypeScript, TailwindCSS, and modern JavaScript frameworks. Skilled in translating product and UI/UX designs into clean, high-performance interfaces with strong attention to usability and performance optimization. Experienced working on startup products, business websites, creator-focused platforms, dashboards, and digital transformation projects. Proficient with Git, REST APIs, responsive design principles, and collaborative development workflows. Passionate about building impactful digital products, solving real-world problems, and continuously improving frontend architecture and user experience.

Skills

Frontend development — Proficient
HTML, CSS (Flexbox, Grid), JavaScript, Nextjs, Typescript, Tailwindcss, React.

Mobile app development — Amateur
Flutter

DevOps — Competent
Docker, Kubernetes, Jenkins, Ansible, CI/CD pipelines, Git, Linux, Python scripting, terraform

Others — Proficient
REST API integration, responsive design, cross-browser compatibility, component architecture,

Professional Experience

Frontend Engineer , <i>Neukleos</i>	06/2025 – present Ikeja, Lagos, Nigeria
• Build and improve responsive web applications using React and Next.js, ensuring consistent performance across devices and browsers. • Collaborate with designers to translate wireframes into clean, accessible interfaces that match client specifications. • Integrate REST APIs and server-side endpoints to surface dynamic content and handle user interactions reliably. • Partner with backend developers to ensure smooth front-to-server data flow across the product. • Write maintainable, scalable code with a focus on page speed and performance optimization.	
Frontend developer , <i>Digitaley drive</i>	12/2024 – 05/2025 Yaba, Lagos state, Nigeria
• Built and maintained the company's LMS and main website, ensuring uptime and operational reliability for the learning platform. • Collaborated with the data analytics team to design an intuitive student-facing dashboard that improved information accessibility. • Translated design mockups into responsive, accessible components integrated with backend services.	

Computer Science instructor, Sound Foundation secondary school

07/2024 – 05/2025
Okitipupa, Ondo state,
Nigeria

- Taught Computer Science to junior secondary students, introducing Python programming and database management concepts.
- Ran hands-on coding sessions that measurably improved student engagement and practical understanding.
- Conducted weekly assessments to track student progress and adjust teaching approach based on results.

Frontend developer intern (Team Member),

State Information Technology Agency (SITA)

05/2023 – 11/2023
Akure, Ondo state,
Nigeria

- Built responsive UI components for a government e-commerce platform using HTML, CSS (Grid, Flexbox), and JavaScript.
- Collaborated with the Director and Deputy Director of the Software Department to develop an LMS for a secondary school using WordPress.
- Trained incoming SIWES interns on HTML, CSS, and JavaScript fundamentals, guiding them through responsive web development best practices.

Projects

Digitaley Drive LMS

I worked closely with the UI/UX designer and backend engineer to develop and maintain a user-friendly Learning Management System (LMS) and the official website for Digitaley Drive. My role involved translating design into responsive, accessible frontend components, ensuring seamless integration with backend services, and optimising the user experience across devices. This collaboration helped deliver a cohesive and intuitive platform that supports the organisation's learning goals and professional image.

Ethnocentrique website

- Collaborated with UI/UX designers to develop and maintain a user-friendly official website for Ethnocentrique.

- Translated design concepts into responsive and engaging interfaces using NextJS, TypeScript, and Tailwind CSS, ensuring seamless user experiences across various devices.

Image and time , *Creative Agency official Website*

The Image & Time website is a portfolio platform that showcases the agency's expertise in design, advertising, and digital innovation. It highlights their work, approach, and impact in helping brands connect with audiences and stand out in a competitive market.

Lagos games week , *Gaming Conference & Exhibition Platform*

Lagos Games Week is an annual premier conference and exhibition dedicated to growing the African video games industry. Held in Lagos, Nigeria, it connects creators, investors, and industry leaders through panels, tournaments (like GamrX), and pitching sessions, aiming to build a \$100 million gaming ecosystem.

E-commerce website

Developed the UI for CARA, a modern e-commerce clothing website featuring product listings, detailed product pages, shopping cart functionality, and checkout flow for an enhanced user shopping experience.

Education

Bachelor of Science in Computer Science, Redeemer's University	01/2021 – 10/2024
• Relevant coursework: Data Structures, Software Engineering, Algorithms, Database Management Systems, Operating Systems, Web Development, Artificial Intelligence, Computer Architecture, and Cybersecurity • Held an executive role with the Redeemer's University Association of Computer Science Students (RUNACOSS)	Osun state, Nigeria

Certificates

New Horizon • Certified Secure Computer User, Topics covered: Oracle SQL Fundamentals, Introduction to Java & Android Mobile Application Development.	Udemy - Kodekloud academy • DevOps Course Topics covered: Linux, Git, networking, terraform, Docker, Kubernetes, Ansible, CI/CD pipelines, etc.	Udemy - Angela Yu • Frontend developement Topics: Frontend development learning HTML, CSS, Javascript, React.
Bincom dev Academy • IT Infrastructure and DevOps: Topics covered: System Administration, Cloud Computing, Linux, Git, DevOps.
